Voyager is the outcome of our musical journey since the critically acclaimed debut album Relationships (2013) where the story behind the music was my relations to different persons, places and experiences. The music on Voyager is a snapshot of FLUX's progression over the last couple of years, after many concerts and tours that have shaped the sound and aesthetic expression of the band. This process has made an impact on the way I compose, hence the music on this album is an open invitation for the listener to travel through various soundscapes and form their own images and associations.

-Thomas Albæk Jakobsen
